

GENERAL NOTES

- **GROUND COVER:** in all areas noted for installation of Ground Cover but with no specific plant names - it is suggested that a minimum of (3) Carex species from the Ornamental Grasses list be installed in intertwining "sweeps" (mass Plantings). Selected Perennials may be interspersed within the planting.
- Soil will be needed in any areas with removals - so as to fill the resulting voids.
- All new plantings to be covered with 2-3" of shredded bark mulch.
- Where any areas are left bare due to bed realignment, those areas to be seeded.
- In most cases of existing hedgerows around parking area it is **SUGGESTED** to trim back the hedgerow plants by a minimum of (50) percent.
- In all parking areas with any existing shade trees it is **SUGGESTED** that these trees be "elevated" - the lower limbs removed to a height of 8 - 10 feet.
